

Are the Nordics Getting Tough on Crime?

- And if so, how to measure these changes ?

Tapio Lappi-Seppälä

University of Helsinki, Institute of Criminology and Legal Policy

NSFK working group- Helsinki 1-2 October 2016

How to measure "toughness"

1. The punitive direction of legislative activities (what the governments have done)
2. Political speech (what the politicians promise to do)
3. The use of prison (the toughest punishment)
4. The use of other sanctions (the extent of penal control)
5. The intensity and effectiveness of CJ-process: detection -> pre-investigation -> prosecution -> sentencing -> enforcement
6. Enforcement practices, prison conditions & experiences (what does the prison mean)
7. Police behaviour & respect of human rights
8. Social control excerciced by other branches civil & administrative law (immigrants)
9. Public attitudes & sentiments (what do the people think)
10. ...

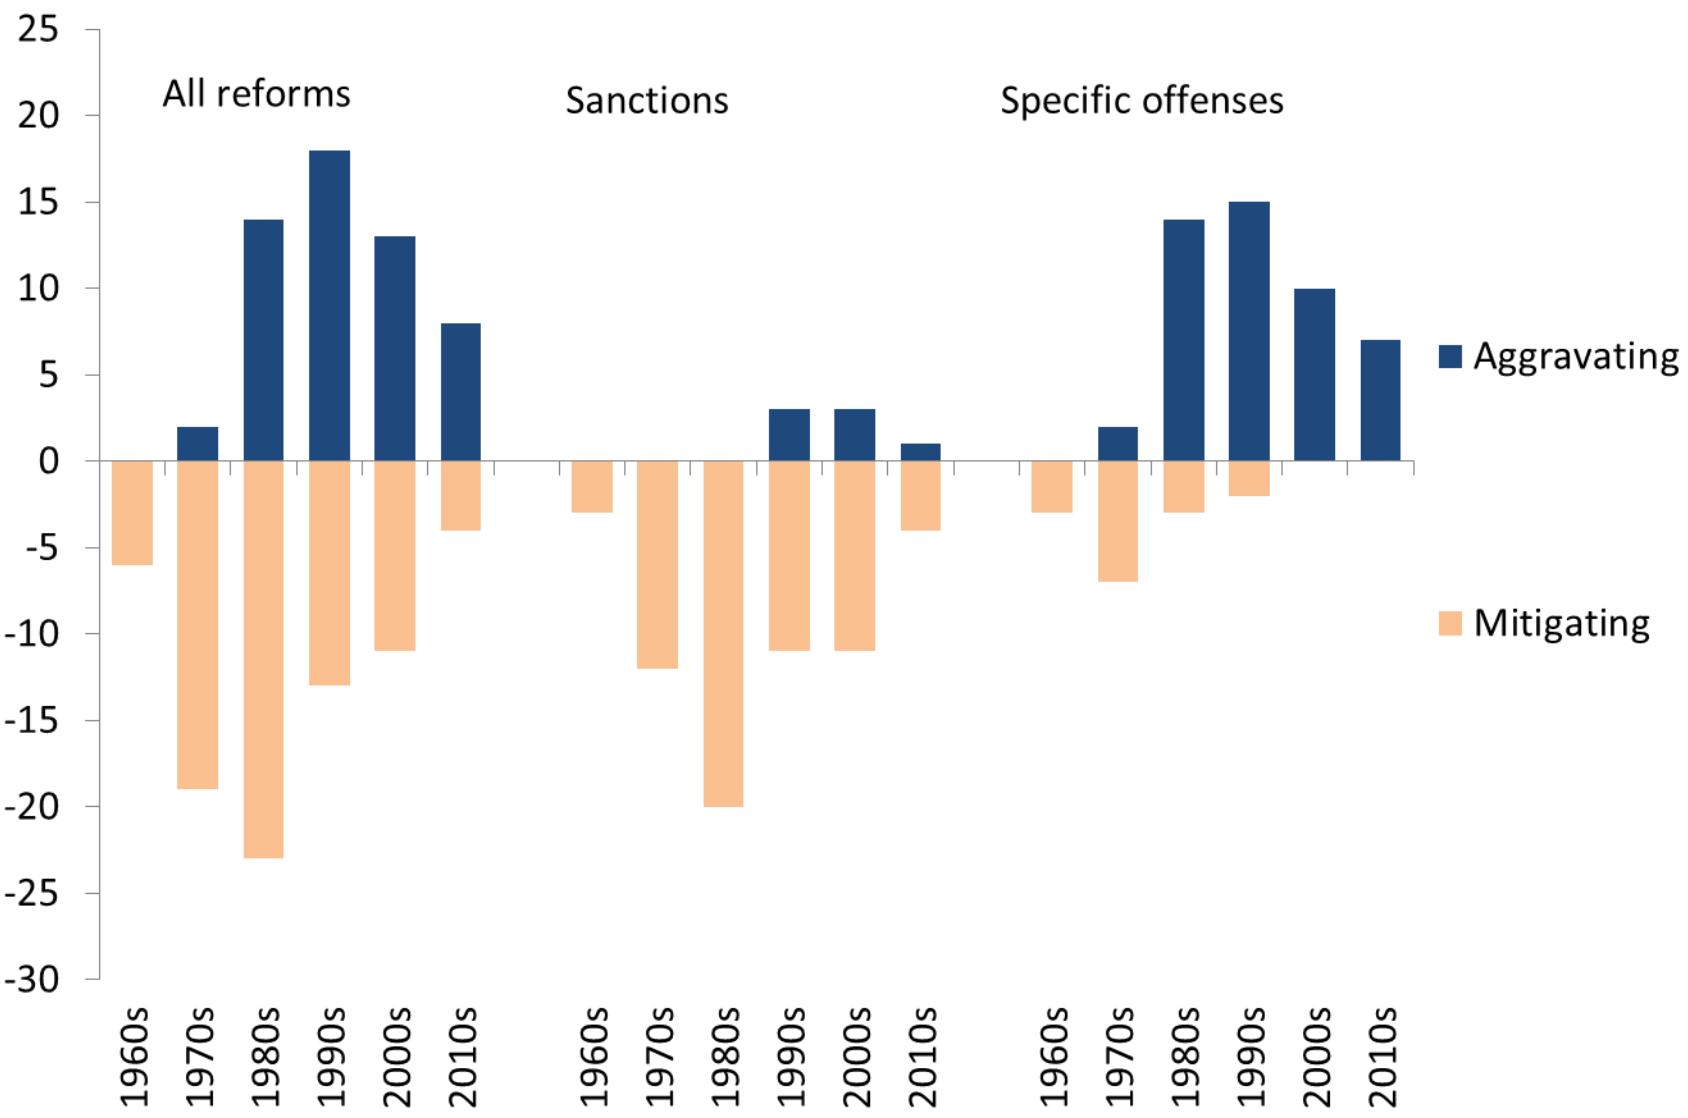

1. In terms of legislation the Nordics changed the course during the 1980s – or a bit later (Finland)

Clear division of labour:

Toughness with specific offenses

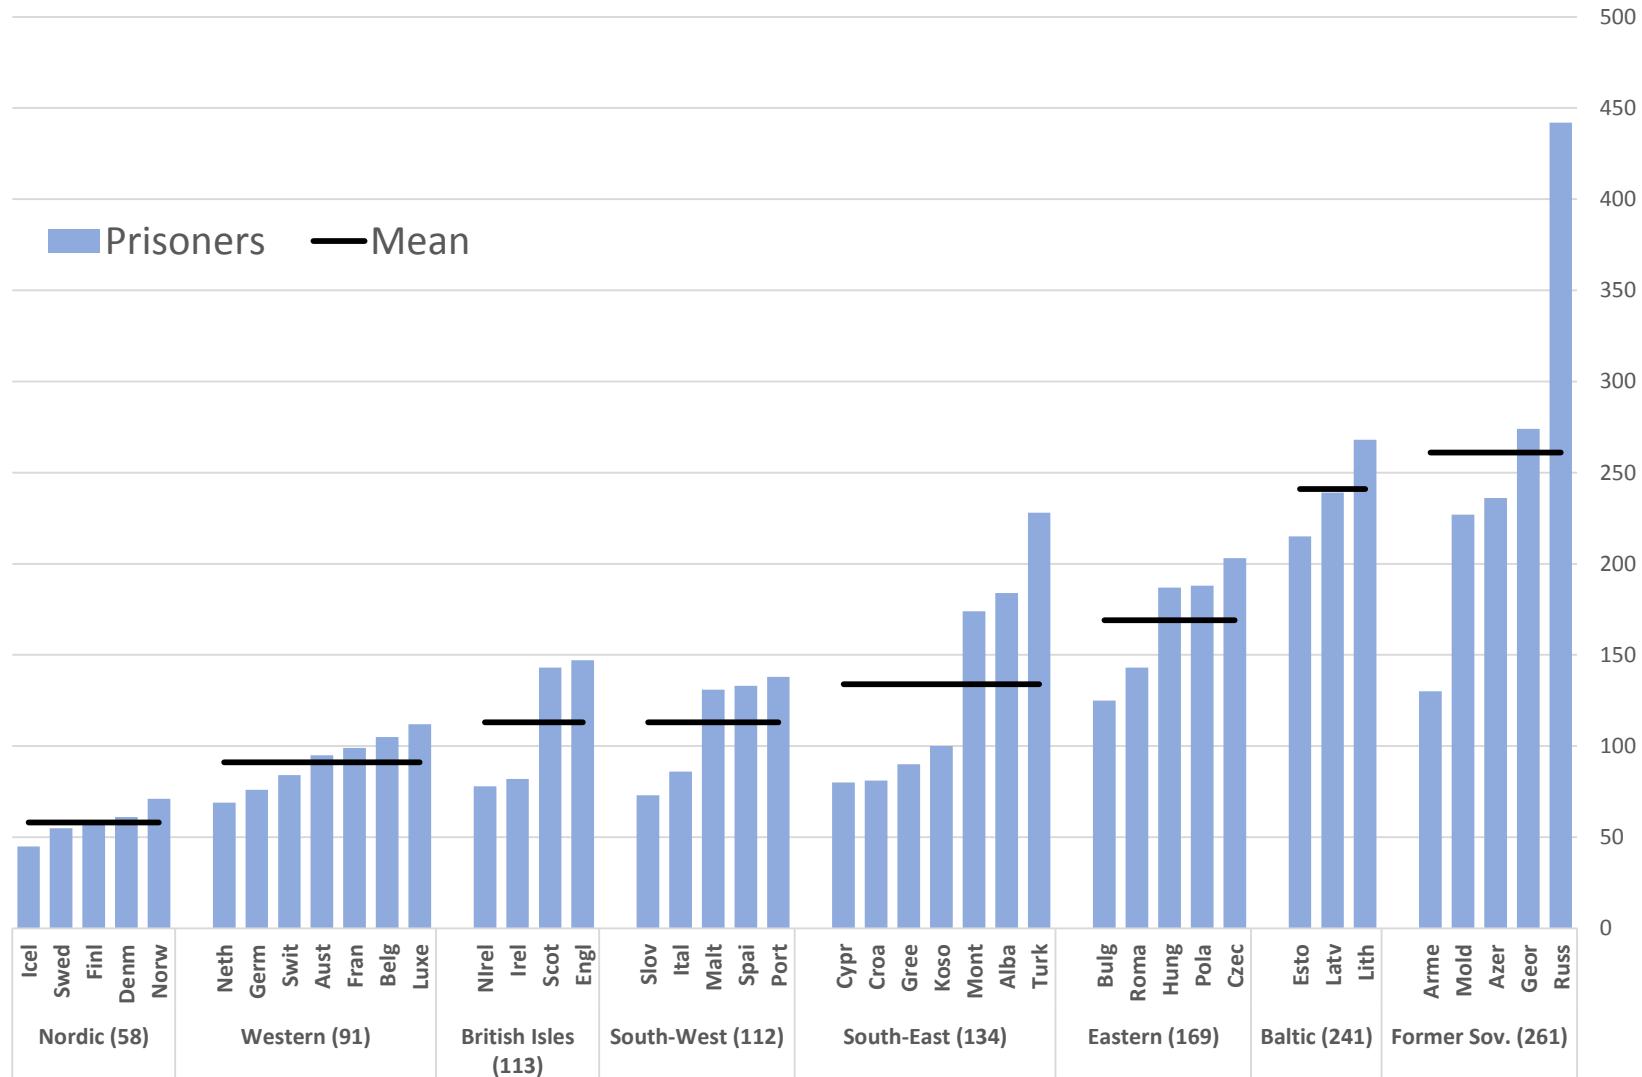

Moderation with the sanction system

Law reforms in four Nordic countries from late 1960s to early 2010s

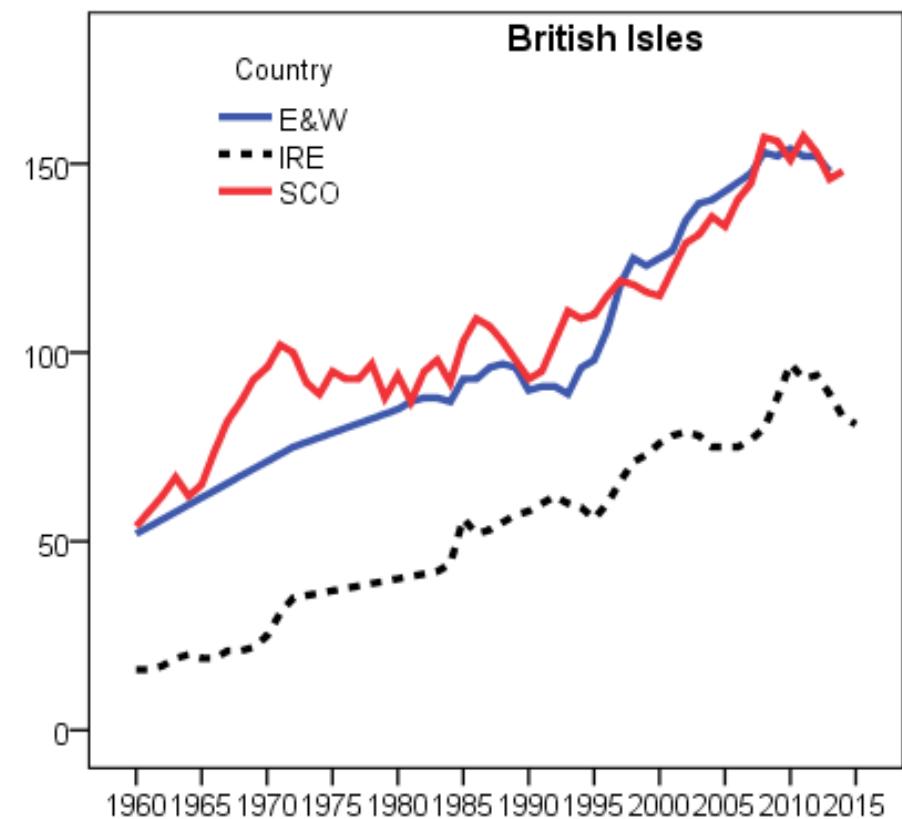

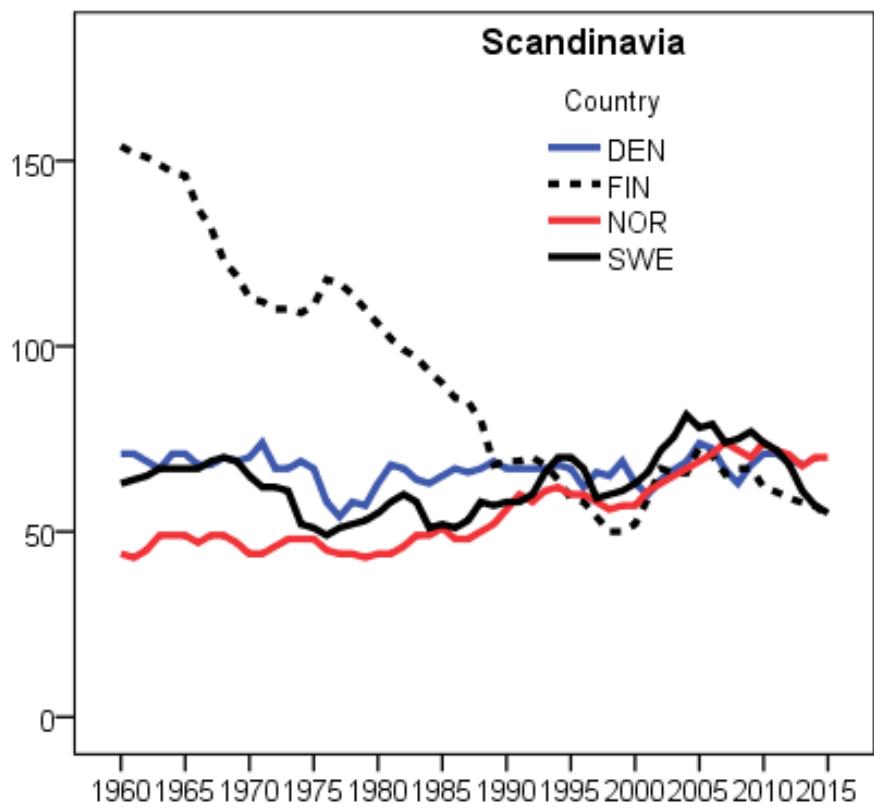

2. In the use of imprisonment the Nordics are the least tough region in the world – and things do not seem to be getting any worse (at least in Finland and Sweden)

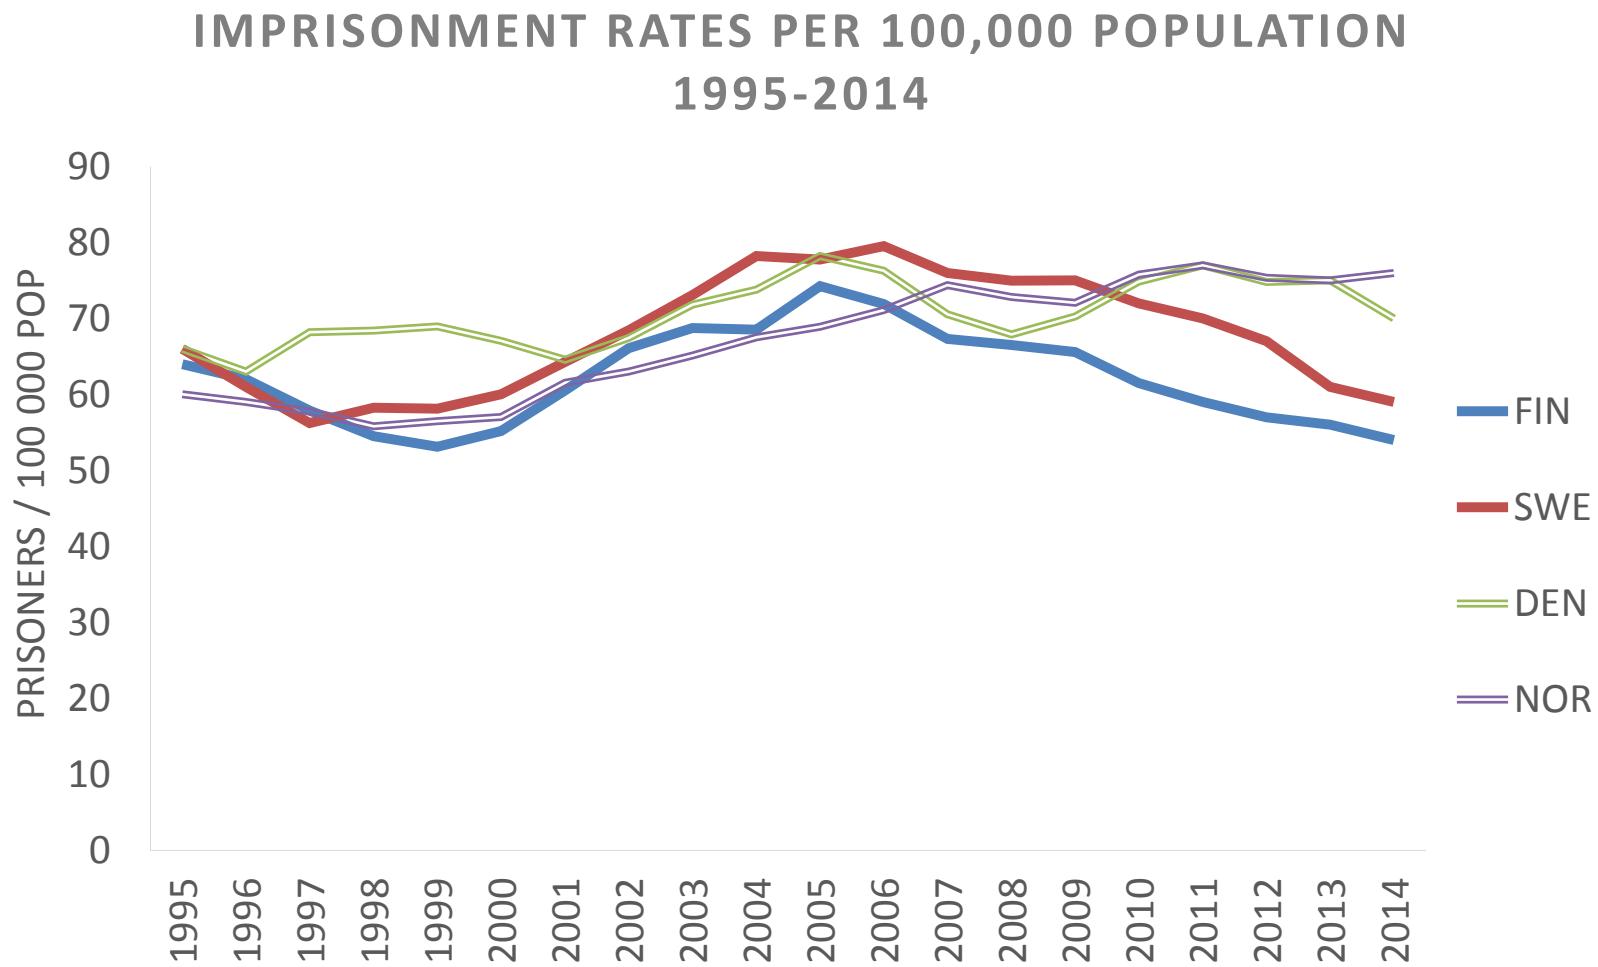

Imprisonment rates in Europe by regions 2014-2016

IMPRISONMENT RATES IN THE NORDIC COUNTRIES AND THE BRITISH ISLES 1960-2015

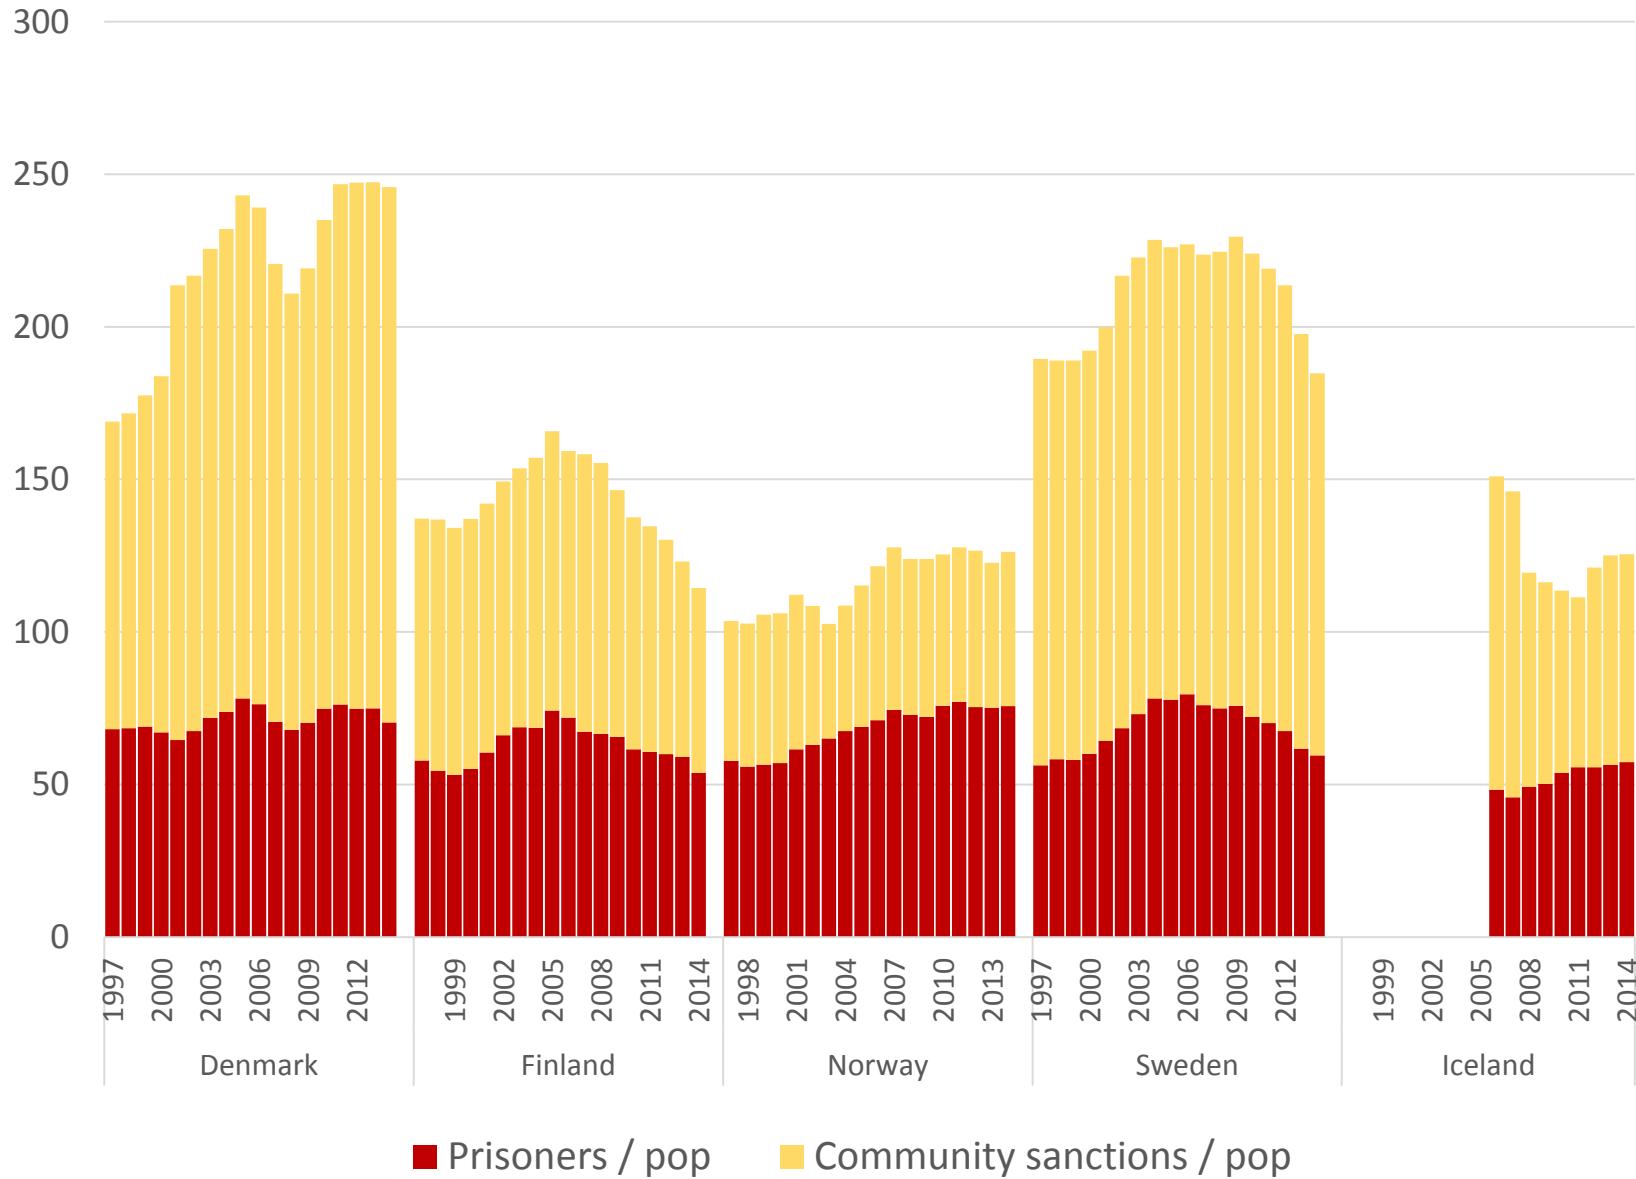

Nordic prisoner-rates 1995-2014

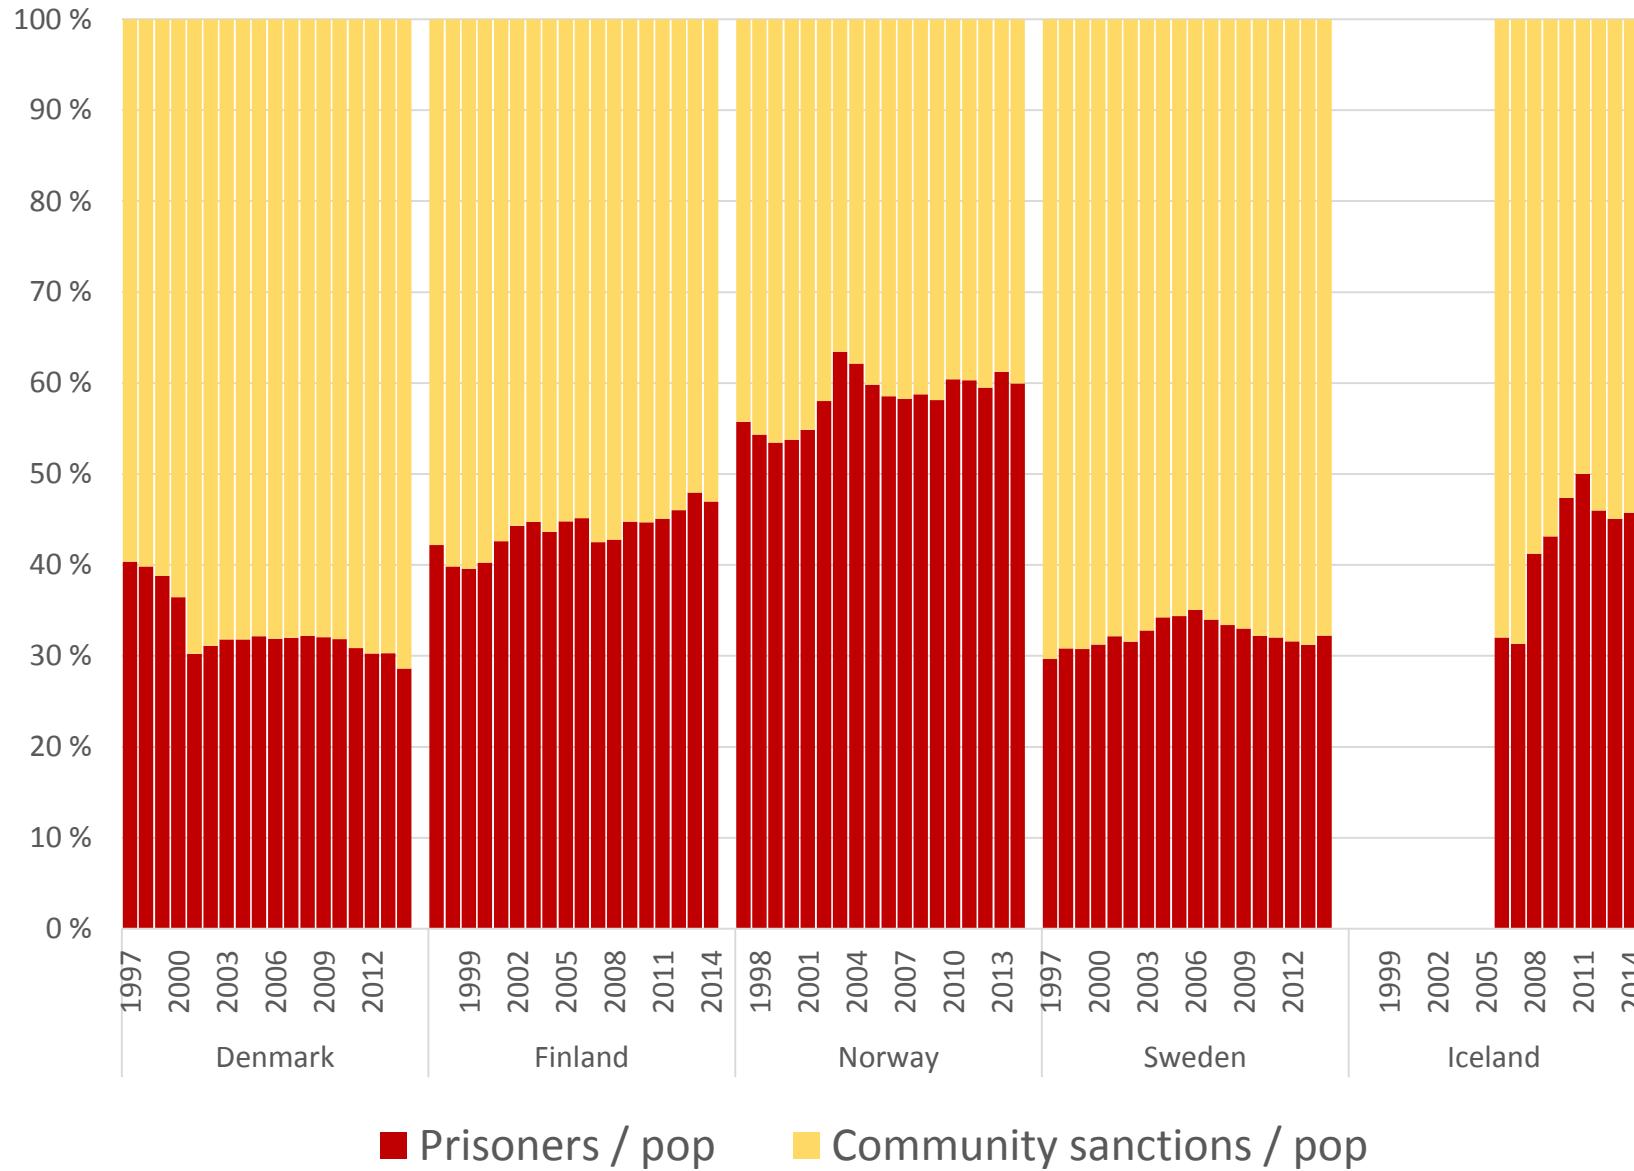

3. When it comes to the use of other sanctions, the countries are in a different position – but nothing indicates any major shift towards harsher regimes

But see Denmark and Norway

Prisoners and offenders in probation 1997-2014 /pop

Prisoners and offenders in probation 1997-2014 (%)

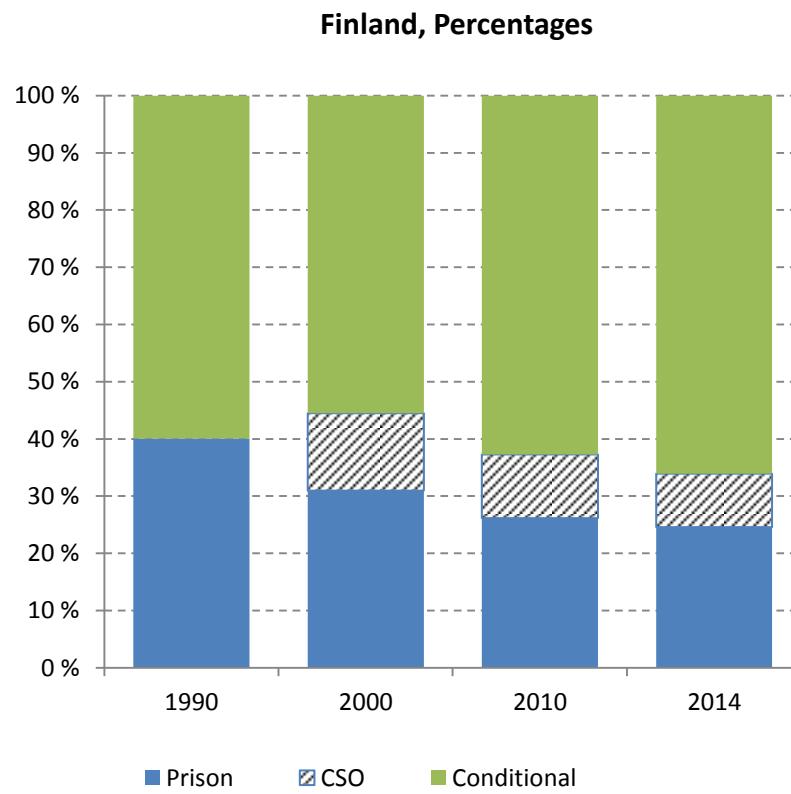

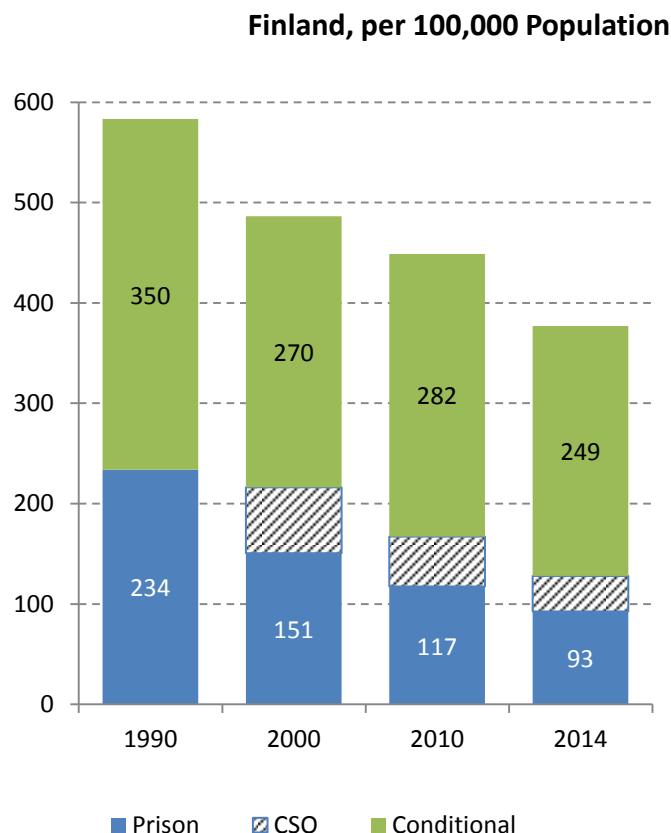

4. How sentencing in the courts has changed

Indicators:

1. The number of imposed community sanctions and prison sentences / pop
2. The distribution (% shares) between community alternatives and imprisonment

Finland 1990-2014

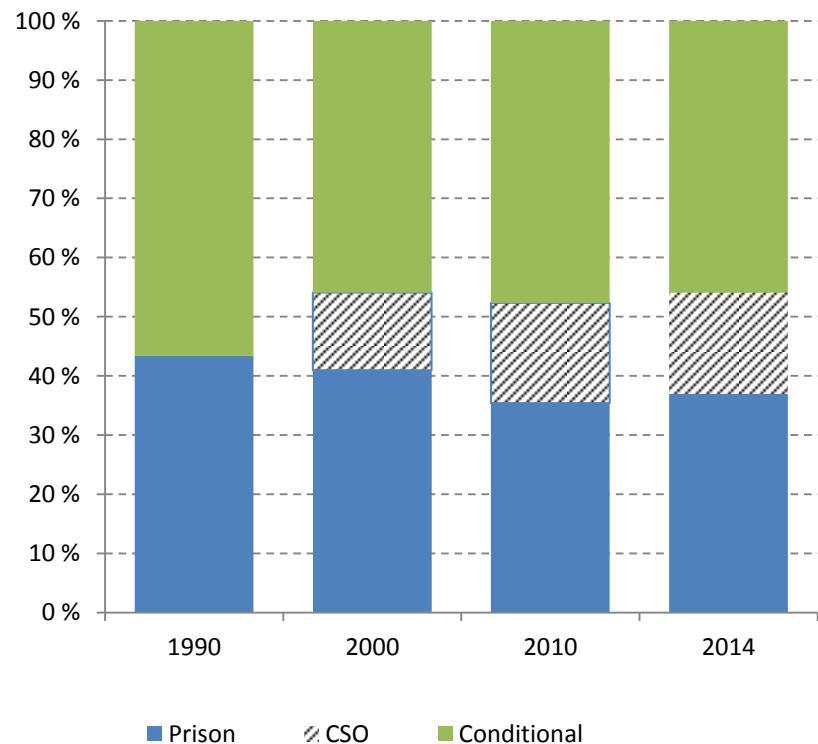

Sweden 1990-2014

Sweden, per 100,000 Population

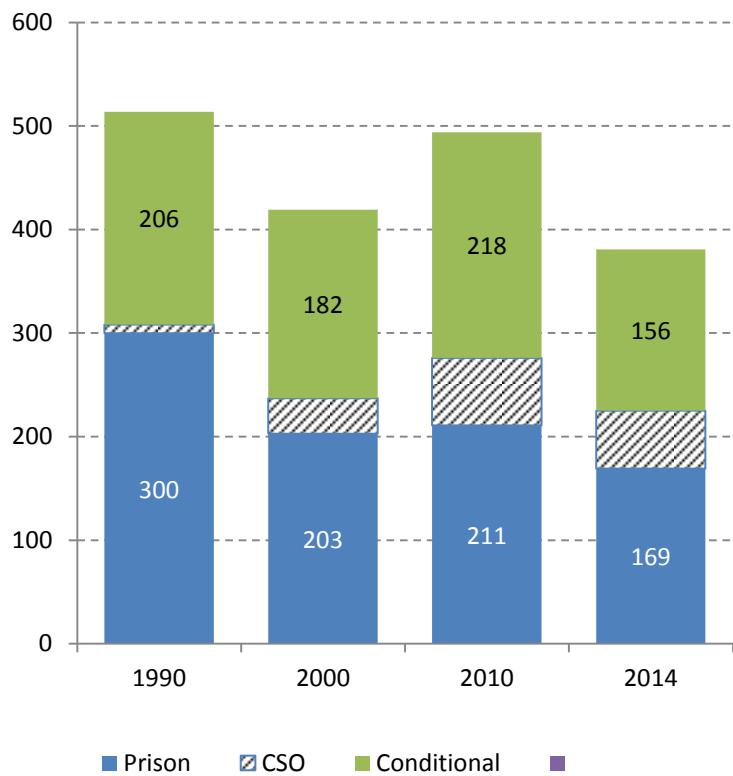

Sweden, Percentages

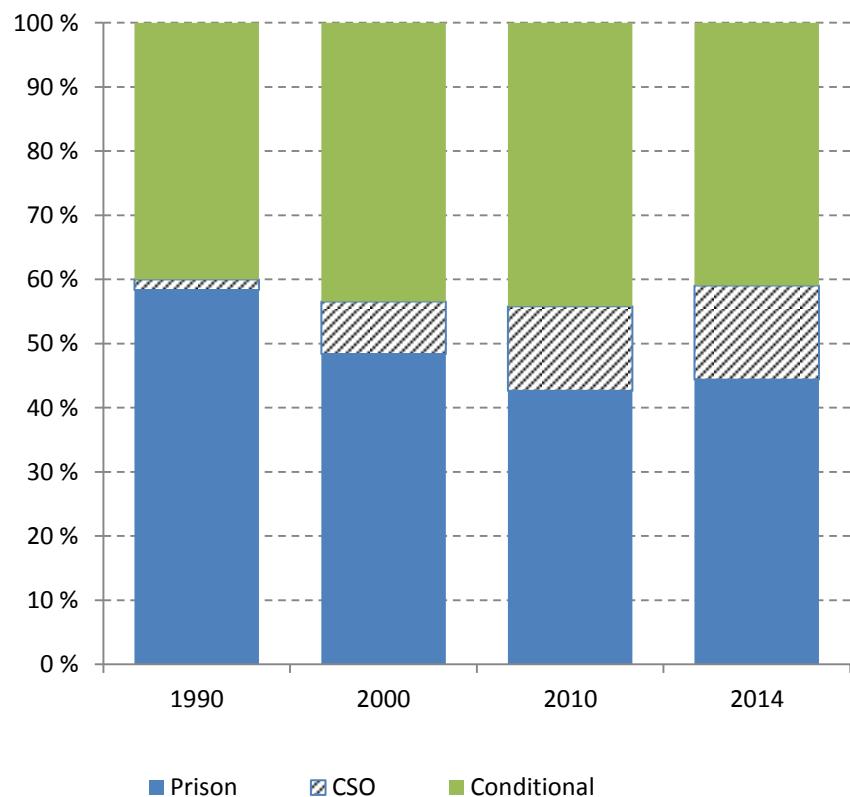

Denmark 1990-2014

Denmark, per 100,000 Population

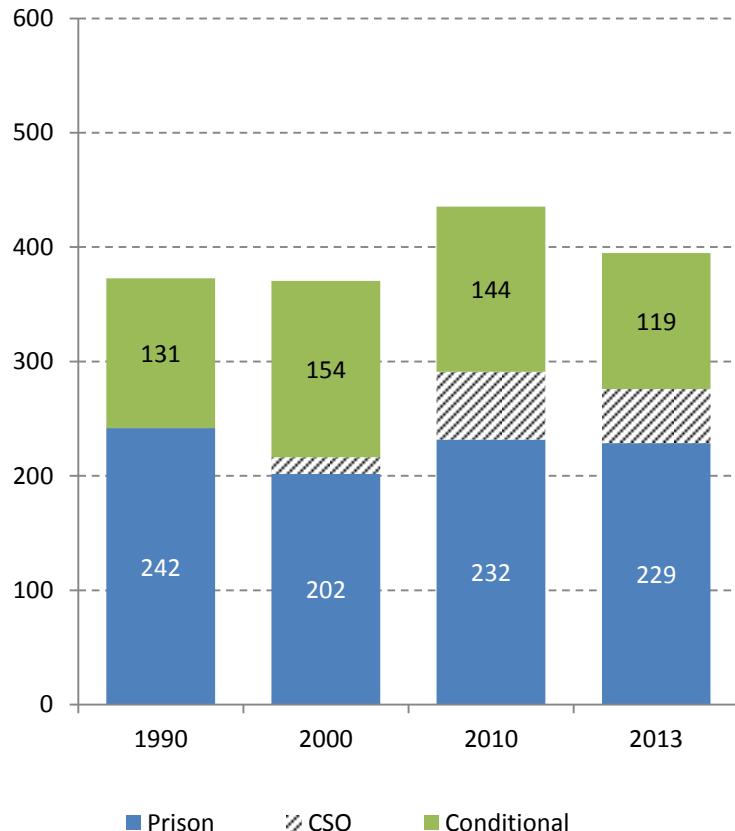

Denmark, Percentages

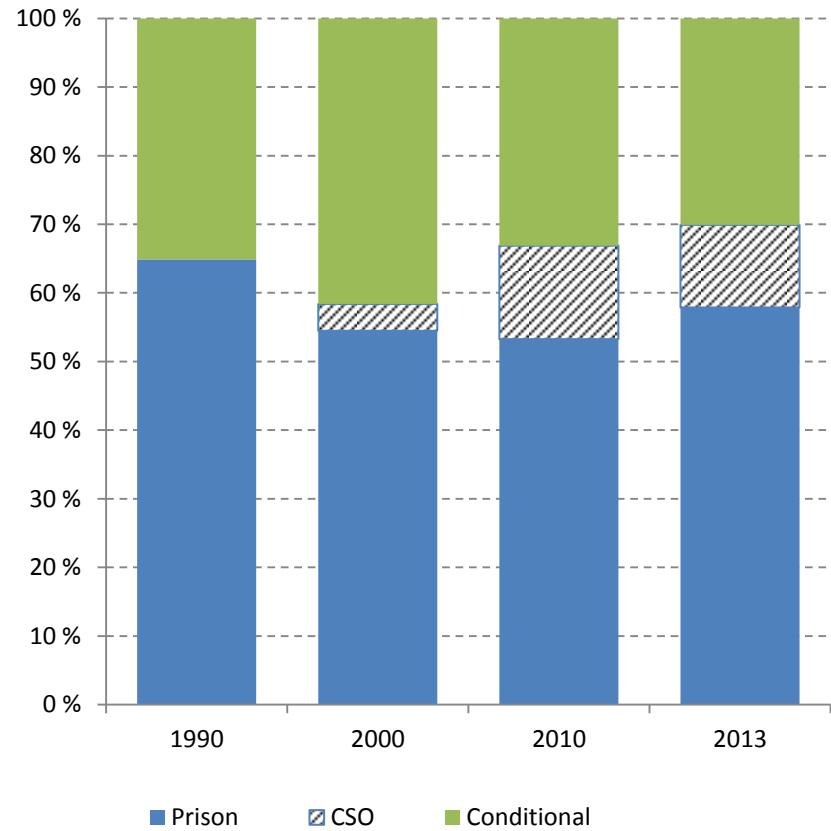

Norway 1990-2014

Norway, per 1000,000 Population

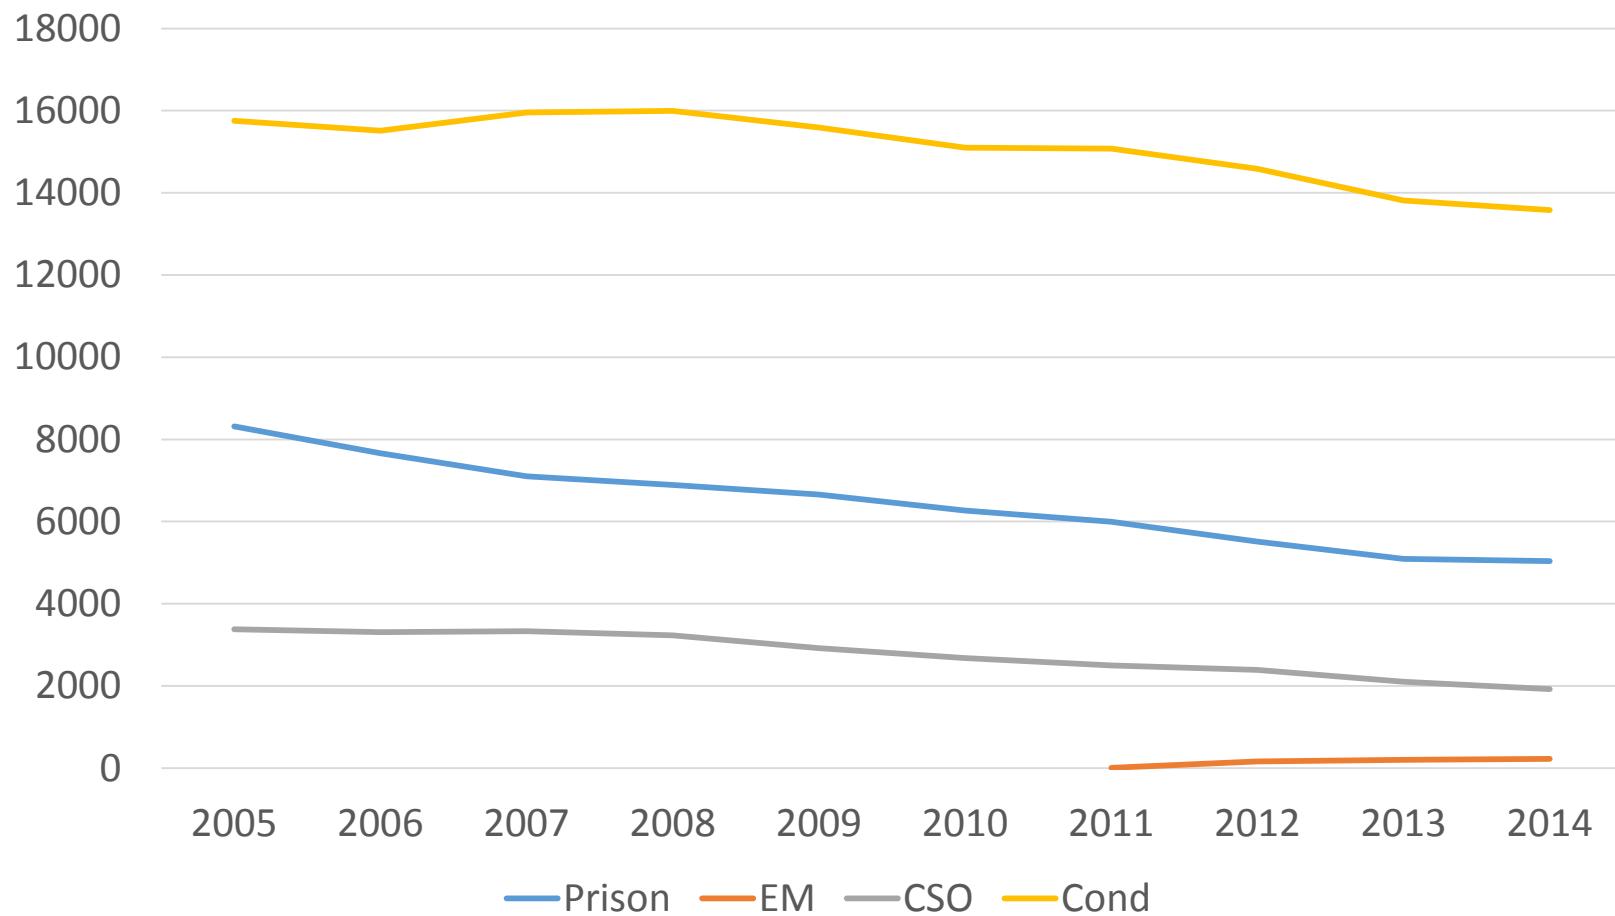

Norway, Percentages

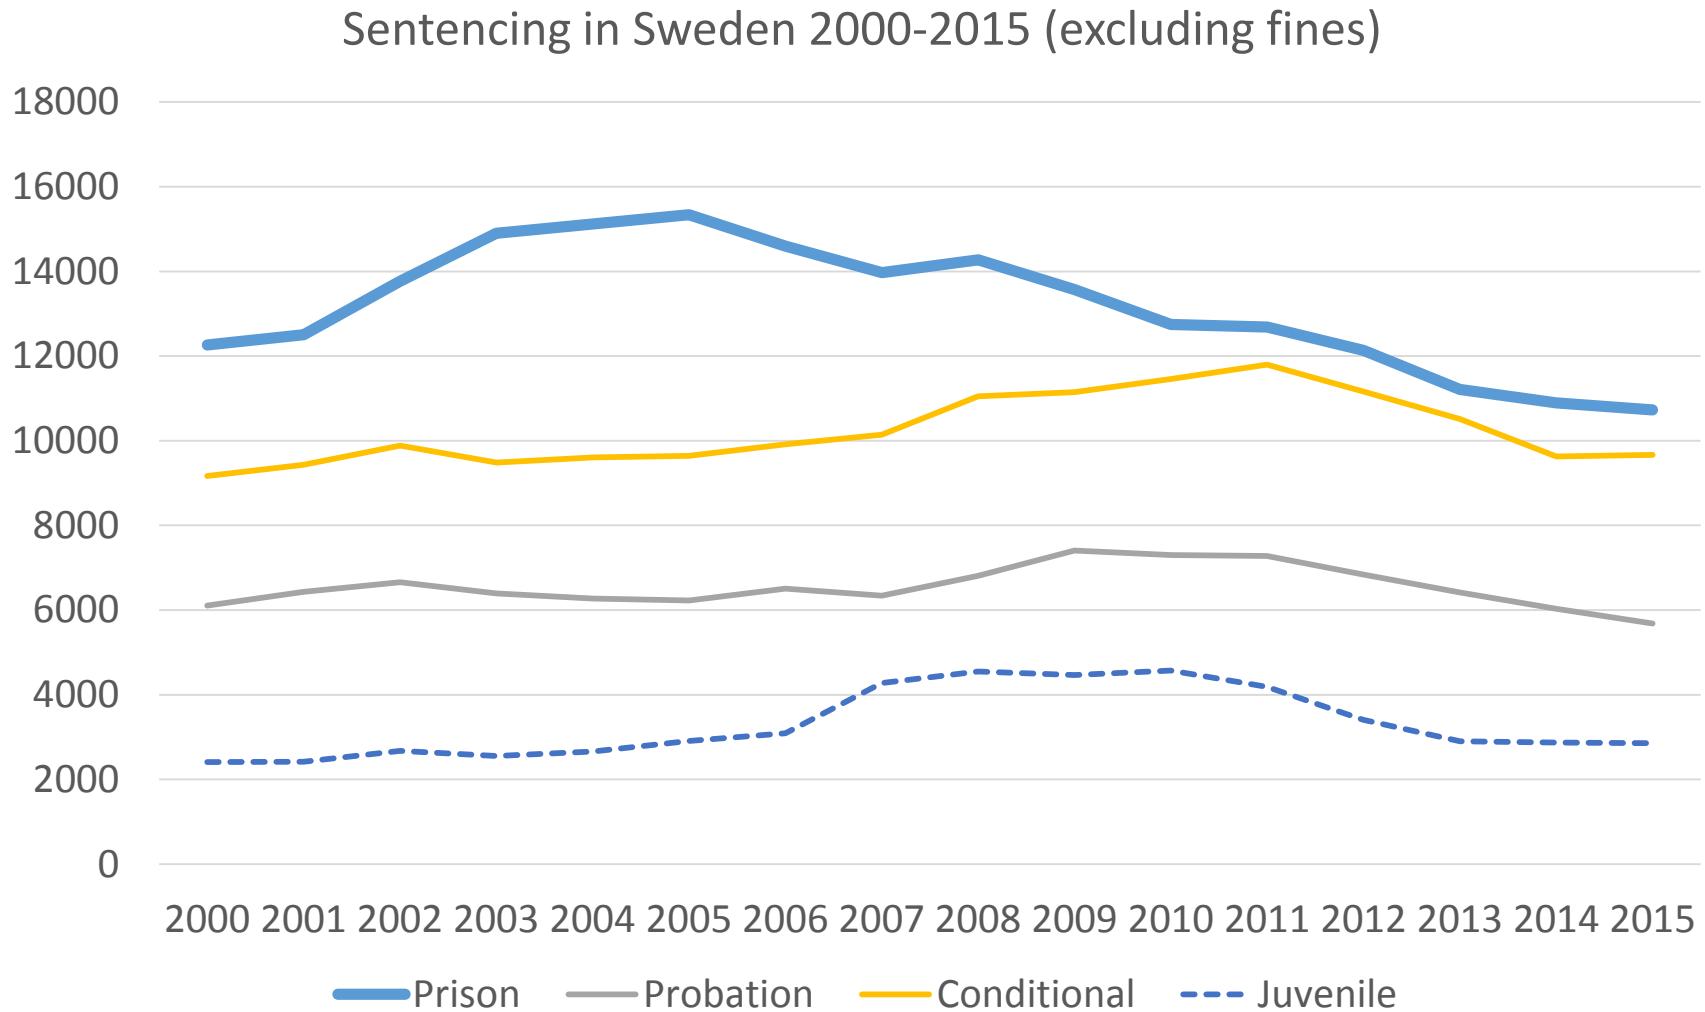

Sentencing in Finland 2005-2014

Court imposed sanctions (other than fines) in Finland 2005-2014

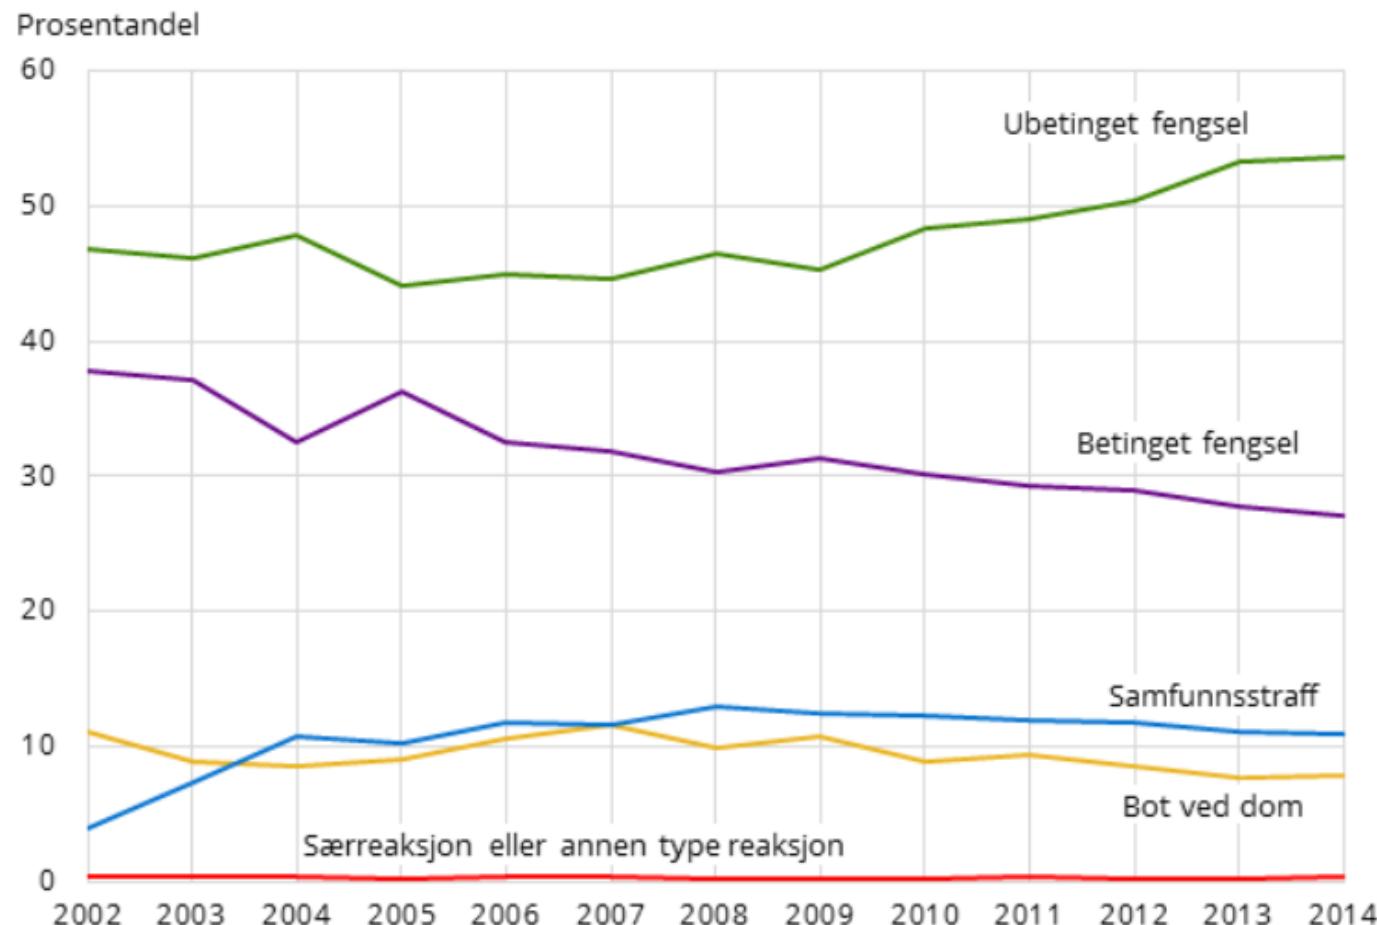

Sentencing in Sweden 2000-2015

Sentencing in Norway 2002-2014

Figur 3. Straffereaksjoner tilgitt av domstolene, etter type reaksjon

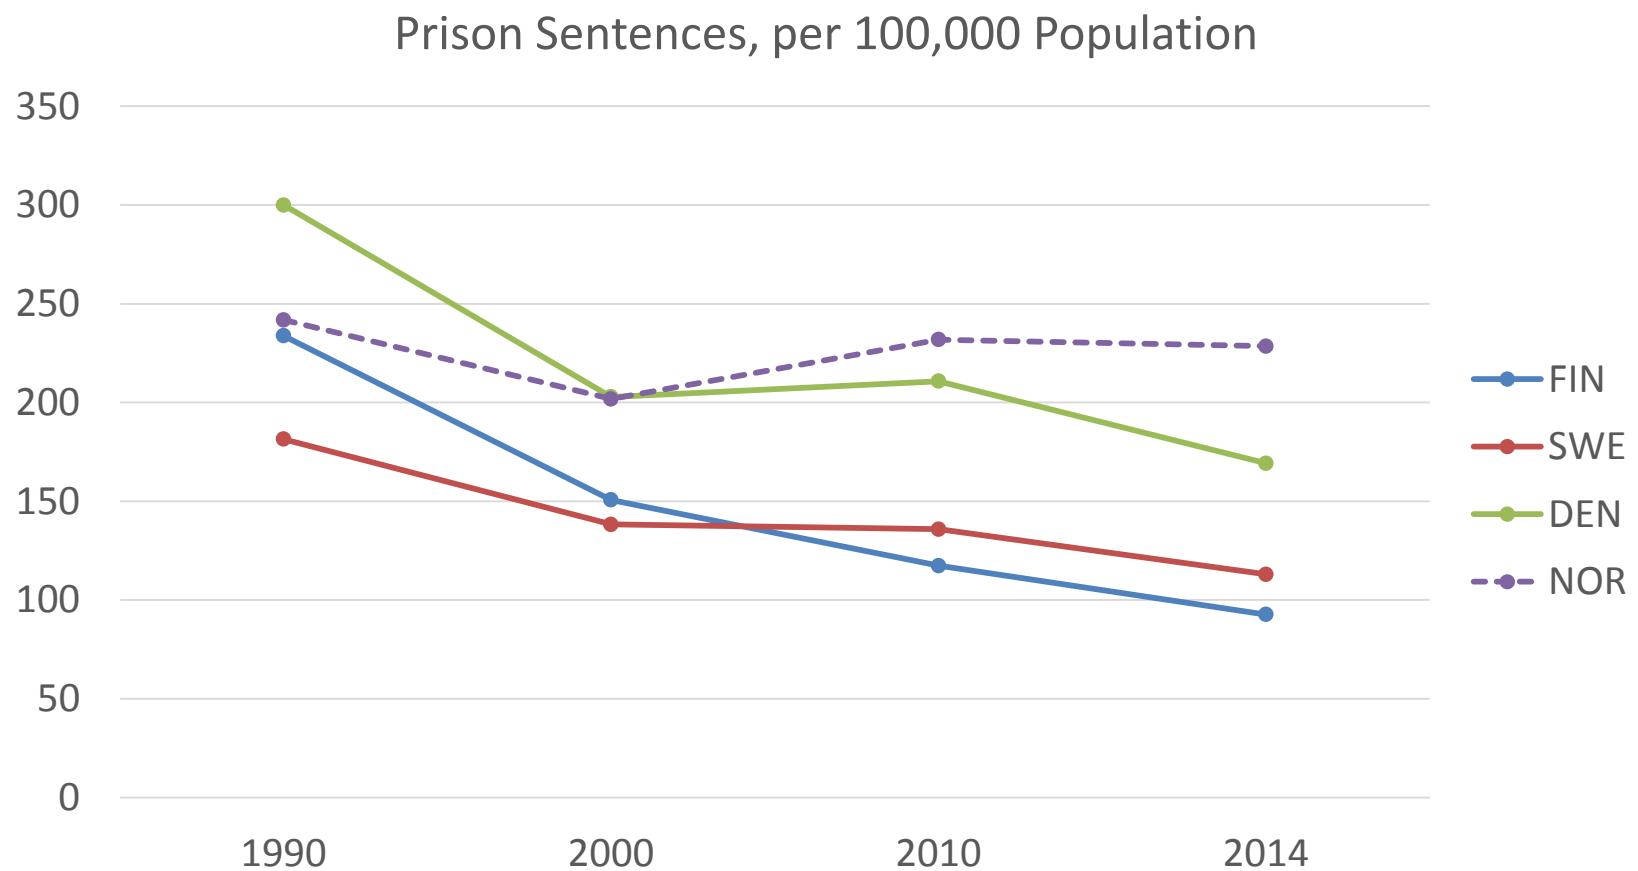

-> The total number and relative share of prison sentences has been in decline – however with the exception of Norway

5. The use of imprisonment and the court imposed prison sentences 1990-2014

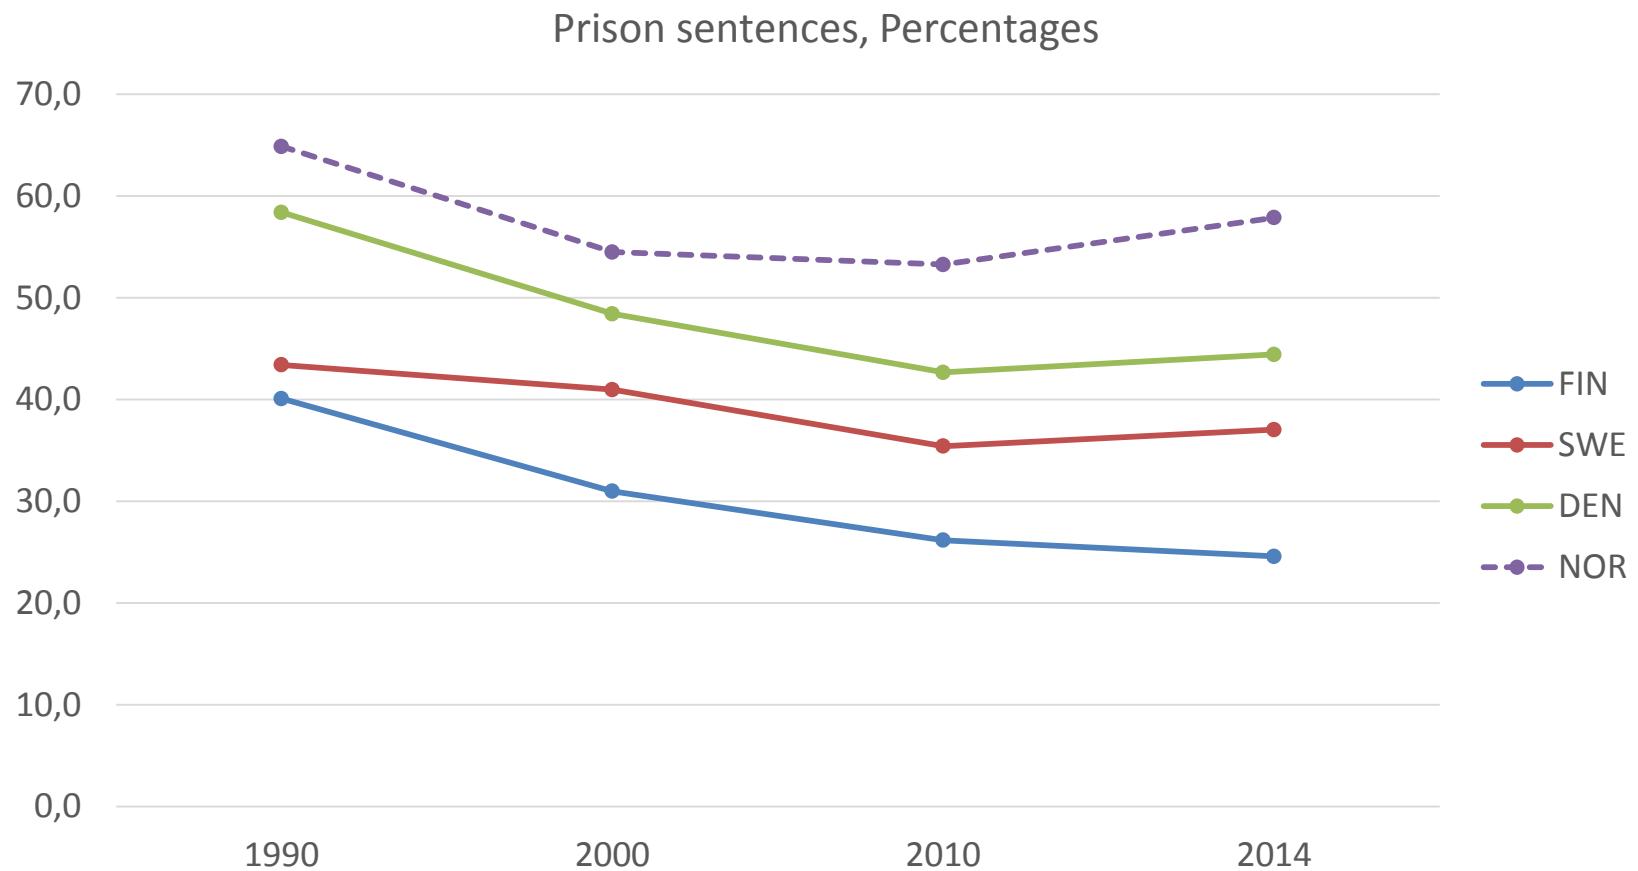

Indicators:

1. The number of imposed prison sentences / pop
2. The share (%) of prison sentences of all (fines excluded)
3. The length of prison term (in months)
4. Total volume of imposed prison years / pop ($N * \text{length}$)

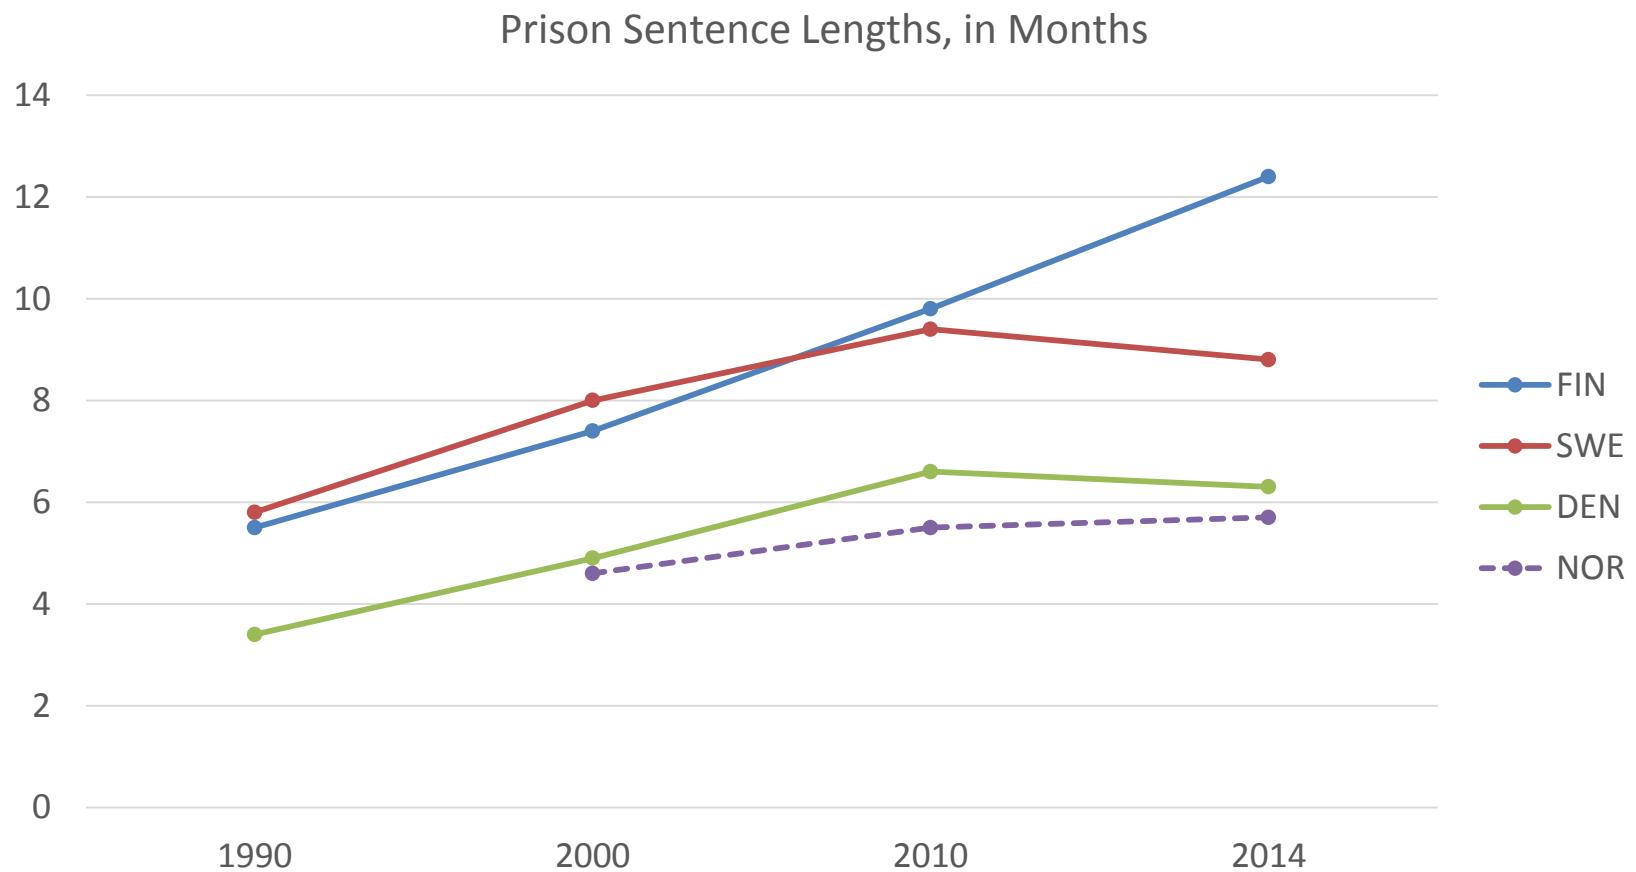

Number of prison sentences/pop

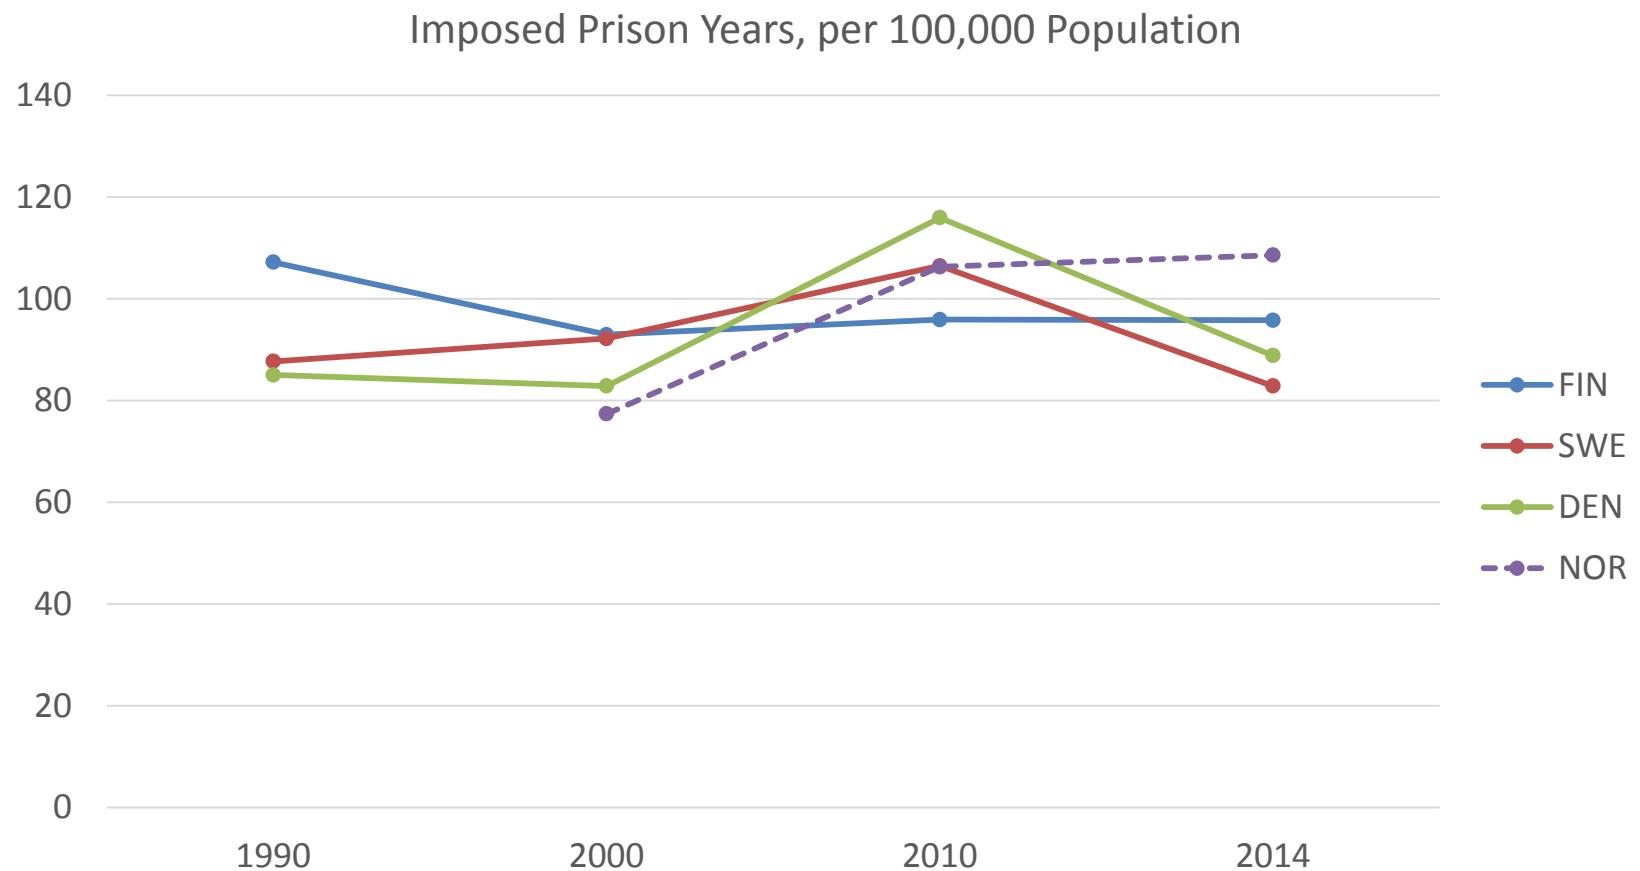

The share of prison sentences (% fines excluded)

Length of prison sentences (mths)

The number of imposed prison years / pop

The use of life imprisonment

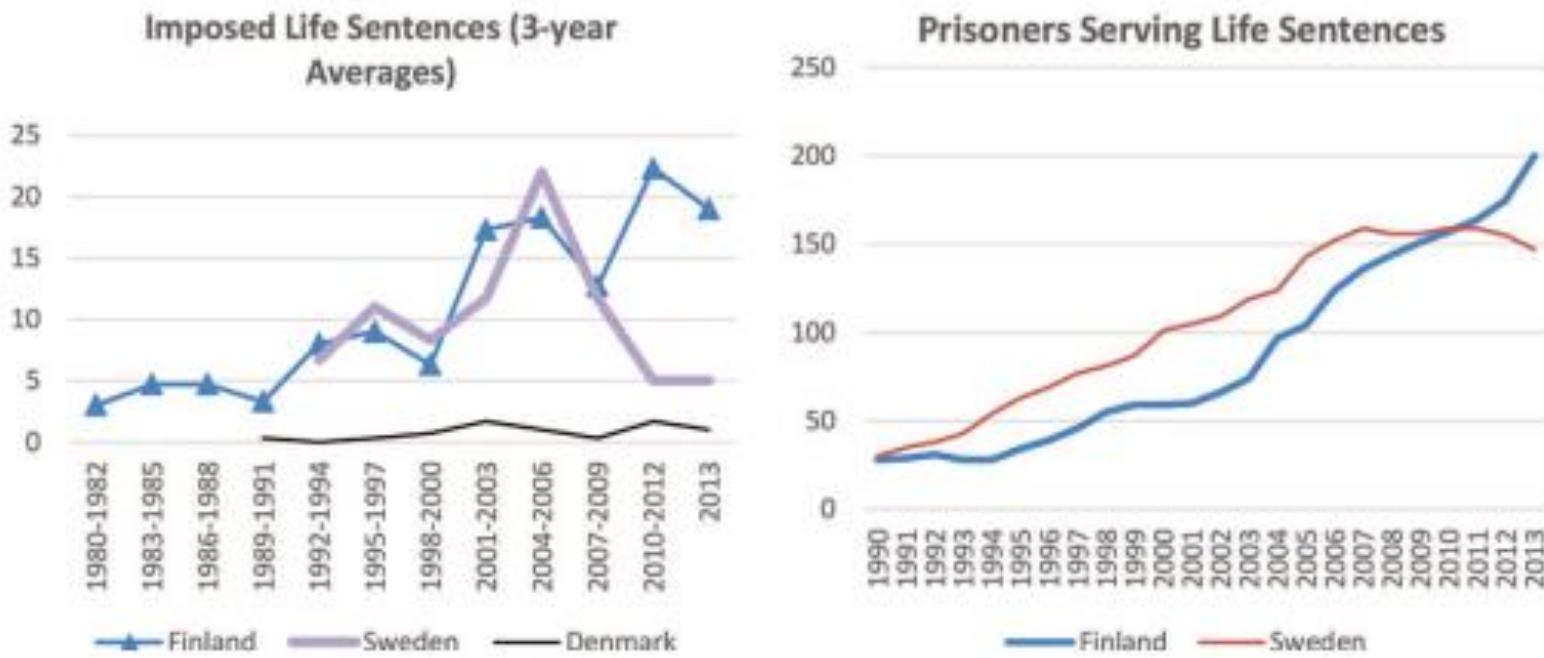

FIG. 8.—Imposed life sentences and absolute numbers of prisoners serving life sentences.

6. New alternatives

Electronic monitoring

– Threat or an opportunity?

Introducing EM and its forms

- “Back door” (as a form of conditional pre-release)
 - Sweden 2001: max 3 months (2007 6 months) pre-release
 - Denmark 2005: max 6 months pre-release
 - Finland 2006: max 6 months pre-release
 - Norway 2008: max 4 months pre-release
 - Iceland 2011: 1-8 months pre-release depending on the length of sentence
- “Front door” (by court order or prison administration)
 - Sweden 1999: sentence conversion max 3 mths (2005 6 months) by prison administration
 - Denmark 2005: sentence conversion max 3 mths by prison administration (2010 up to 5months, 2013 up to 6 months)
 - Norway 2008: sentence conversion max 4 mths by prison administration
 - Finland 2011: as a part of max 6 months supervision order by court

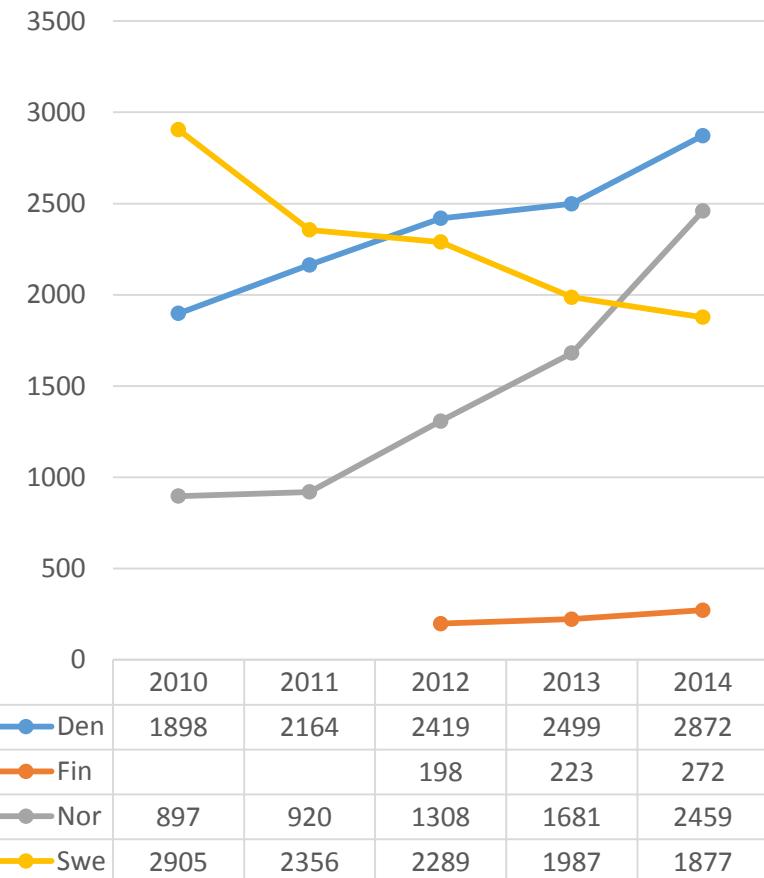

ELECTRONIC MONITORING 2014 (absolute)
